PROFESSIONAL SUMMARY

Full Stack Developer with 2.6+ years of experience building and maintaining web applications across frontend, backend, and deployment workflows. Skilled in developing responsive user interfaces, REST APIs, admin panels, CMS-style systems, third-party integrations, using React.js, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, JavaScript, and TypeScript. Experienced in deploying using Docker, Nginx, PM2, Linux, and VPS environments.

SKILLS

Frontend: HTML, CSS, JavaScript, React JS, Redux Toolkit, Tailwind CSS, Next JS

Backend: Node JS, Express JS, Redis

Database: MongoDB, Mongoose, PostgreSQL, Redis

DevOps / Deployment: Docker, VPS Deployment, Nginx, PM2, Linux, Cloudinary, AWS (EC2, S3, IAM)

Tools & Workflow: Git, GitHub, Postman, AI-assisted development (Cursor, Claude Code, Antigravity)

PROFESSIONAL EXPERIENCE

Full Stack Developer

Nov 2025 – Present

Stealth Digital, Delhi, India

- Built and maintained full-stack web applications for education and **business platforms** using React.js, Node.js, Express.js, PostgreSQL, and **Redis**, delivering scalable user-facing features and backend workflows.
- Architected REST APIs, CRM workflows, Zoho, and WhatsApp integrations, alongside content management modules, streamlining operational application flows and accelerating user engagement by **45%**.
- Managed **Docker-based server** deployment and production environments on VPS infrastructure, applying code quality, dependency, and security-focused tooling to support cleaner and more maintainable server-side systems.

Full Stack Developer

Nov 2023 – Oct 2025

Digi India Solutions, Delhi, India

- Administered **AWS services** including **EC2**, **S3**, and **IAM**, managing server provisioning, storage architecture, and access policies to support secure, reliable, and scalable application deployments.
- Engineered full-stack e-commerce and business application features using React.js, Node.js, Express.js, and MongoDB, supporting both customer-facing experiences
- Implemented **15+ REST APIs** supporting authentication, product catalog management, inventory control, order processing, content workflows, and internal business operations.
- Integrated Cloudinary for managing **5,000+** media assets while improving upload and delivery workflows.

PROJECTS

Delhi Book Store – E-commerce Platform [Link](#)

- Engineered a full-stack e-commerce platform for a large-scale online bookstore, supporting customer purchase journeys, admin workflows, and structured catalog management.
- Implemented country-aware currency handling and payment workflows to improve international storefront usability and transaction support.
- Delivered CMS-style management modules and bulk product ingestion workflows to manage products, categories, business content, and synchronize **200,000+ database** records without overwriting existing data.

Production-Ready URL Shortener

- Designed and implemented a high-Availability URL Shortener and fault tolerance, leveraging Docker for containerization and **NGINX** for load balancing.
- Developed a scalable architecture utilizing Apache ZooKeeper to manage counter synchronization, ensuring efficient URL generation and optimal system performance.

EDUCATION

Master of Computer Applications

2026 – Expected 2028

Lovely Professional University
